

Interface and Diffraction Report

A Student,Another Student,Last Student

March 2,2016

Abstract

Eventually we will learn to write abstracts for our lab reports,but not today,please delete this abstract.

1. Section Name

It is helpful to label the different section of your report.Please choose names that make sense. You may number the sections, like in this example or not (then put an asterik after the section commanded).

2. Analysis

Here you discus your observation and results.

2.1 Double slit Interference

This Substraction command lets's you further divide your section up. Comment on your observation and result here.

2.1.1 Varying Parameters

For lopnger documents, you can even use subsections, it's probability overkill for this analysis.

Still More labels You can also label paragraph
